Professional Summary

Frontend / Full-Stack Engineer with 2+ years of professional experience delivering 12+ web applications for US and European clients. Strong in React.js, TypeScript, JavaScript, responsive UI engineering, Firebase, REST API integration, and multi-role SaaS workflows. Experienced in translating Figma and Adobe XD designs into production-ready interfaces and supporting serverless and PHP backends with authentication, real-time data, payments, and role-based authorization.

Technical Skills

Frontend	React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Tailwind CSS, Bootstrap 5, React Router, Redux, Vite, Framer Motion, Webpack
Backend & APIs	Node.js, Express.js, Firebase Cloud Functions, CodeIgniter 3, PHP, REST APIs, Webhooks, SMTP
Data & Cloud	Cloud Firestore, Firebase Realtime Database, MySQL, MongoDB, Cloud Storage, Firebase Hosting, Secret Manager
Auth & Security	Firebase Authentication, Google Sign-In, RBAC, Custom Claims, Firestore/Storage Security Rules, Input Validation, HMAC Verification
Integrations	SafePay, Stripe, Google Maps API, QuickBooks API, Calendly API
Testing & Tools	Vitest, Firebase Emulator Suite, Git, GitHub, Docker, npm, Figma, Adobe XD, Chrome DevTools, Agile/Scrum

Professional Experience

Nov 2025 – Present
Full-Stack / Frontend Engineer – React.js & Firebase, Buzzware Tech, Islamabad, PK

- **Delivered 12+ client platforms** as the lead frontend developer across React.js and Firebase, with supporting contributions to CodeIgniter 3 (PHP) backends including CRUD operations, route handling, and minor feature additions.
- **Pixel-perfect UI delivery** – translated Figma and Adobe XD designs into production-ready components, cutting design-to-code turnaround by **30%**.
- **Firebase Architecture & Real-Time Sync** – implemented Firestore and Realtime Database listeners for live data streams, developed Cloud Functions for serverless backend logic, configured Firebase Auth with RBAC (Role-Based Access Control), and authored custom Security Rules.
- **Third-party integrations** – Stripe subscription billing, QuickBooks API payroll sync, Google Maps live GPS tracking, and AWS Amplify deployments across multiple projects.
- **AI-assisted development** – integrated Claude AI and GitHub Copilot into daily workflow, reducing boilerplate generation time and accelerating code review and debugging cycles.
- **Reusable component libraries** and SCSS design-system utilities authored to accelerate parallel project delivery; enforced quality via Git pull-request workflows.

Aug 2024 – Oct 2025
Frontend & UI/UX Developer, Fokus LLC, Islamabad, Pakistan

- Developed pixel-accurate, responsive interfaces from Figma designs using HTML5, SCSS, JavaScript, Webpack, and reusable UI patterns.
- Delivered property listing, local-service booking, and event-management interfaces across mobile, tablet, and desktop breakpoints.
- Created reusable SCSS mixins and utilities that reduced repeated styling code by approximately **40%** and improved maintainability.
- Worked with Git-based version control, peer reviews, and sprint-based feature delivery.

Jul 2023 – Oct 2023
Frontend Developer, Aarsol, Islamabad, Pakistan

- Built responsive, cross-browser interfaces using HTML5, CSS3/SCSS, and JavaScript while improving layout consistency, frontend performance, and component reusability.

Jun 2022 – Sep 2022 **MERN Stack Intern**, Cloud-tek, Islamabad, Pakistan

- Developed responsive React interfaces with hooks and state management and implemented REST API exercises with Node.js and Express.js.

Key Projects

TapPakistan – Multi-Tenant NFC/QR SaaS Platform, *React 19, TypeScript, Tailwind CSS, Firebase, Cloud Functions, SafePay*

- Engineered a multi-tenant SaaS platform featuring business onboarding, NFC/QR profiles, branch management, orders, subscriptions, and analytics.
- Built secure authentication, tenant-scoped RBAC, Firebase Cloud Functions, Firestore transactions, audit logs, and automated security tests.
- Integrated SafePay checkout, recurring billing, signed webhooks, and responsive admin/business dashboards with light and dark themes.

OpenClub – Nightclub & Event Management Platform, *React.js, Firebase, SCSS, Framer Motion, Stripe*

- Developed multi-role dashboards for managers, hosts, and promoters, including reservations, guest lists, event analytics, and payment workflows.
- Built an interactive drag-and-drop floor planner with resizable tables, booths, and VIP sections, including collision detection and touch support.

DuePro – Legal-Tech SaaS Platform, *CodeIgniter 3, PHP, Firebase, Stripe, MySQL*

- Implemented real-time chat, attorney discovery, consultation scheduling, document workflows, and role-based interfaces.
- Integrated Stripe subscriptions, Firebase services, and third-party APIs for legal service management.

Rokoli – Medical Transportation Dispatch System, *CodeIgniter 3, PHP, Firebase, Google Maps API, QuickBooks API*

- Developed trip dispatch, live GPS tracking, driver/contractor management, payroll workflows, and operational reporting.
- Integrated Google Maps and QuickBooks APIs to support transportation operations and accounting workflows.

Elite Glam – Appointment Booking Platform, *React.js, Node.js, Express.js, MongoDB, Firebase Auth*

Built a full-stack appointment platform with customer, business, and admin dashboards, booking management, authentication, and role-based routing.

Education

2021 – 2025 **BS Software Engineering**, *SZABIST Islamabad*, CGPA: **3.63 / 4.00**

Certifications

2024 **CSS and JavaScript Crash Course**, *Udemy – Proper Dot Institute*

2026 **MCP Advanced Topics**, *Claude*
